

LUNAR™

LUNAR™ AIR DISC BRAKES SHORTER STOPPING, LONGER LIFE

STEMCO® Lunar air disc brakes help even the heaviest commercial vehicles meet Federal Motor Vehicle Safety Standard 121 maximum stopping distances while contributing less weight per axle than similarly performing drums.

LUNAR HP AIR DISC BRAKE PADS

For Extreme Duty

Lunar HP is the brake pad of choice for severe-duty applications. With its high performance capability and REG90 certification, Lunar HP out performs the competition in any application.

Even Tougher

An advanced wear formula means that Lunar HP brake pads endure the most demanding situations and handle constant temperatures of 670° F and intervals of up to 1650° F.

Advanced Design

Lunar HP brake pads have industry-leading rotor wear performance and are engineered to deliver stopping power while being less abrasive to the rotor. An integrally molded V-groove aids in airflow to remove gasses during a braking event for improved friction responsiveness.

Improved Performance

Full face burnish coating to promote consistent bedding performance.

Lunar is certified copper free to the highest classification awarded by the NPDES.

LUNAR AIR DISC BRAKE PADS

Tested and Trusted

Perform as well or better than OEM parts.

Keeping You Safe

Lunar air brake pads help meet maximum stopping distances per Federal Motor Vehicle Safety Standard 121, even in sustained braking on steep downhill gradients.

Rugged

Each pad comes standard with anti-corrosion coating and a mechanical retention system to increase shear strength and reduce noise. An integrally molded V-groove aids in airflow to remove gasses during a braking event for improved friction responsiveness.

Engineering Performance

Lunar brake pads are designed for constant temperatures of 570° F and intervals of up to 1650° F.
